

## **GAS-TIGHT SUIT CPS 5800**

### **Dräger CPS 5800: Limited-use chemical protection suit**

The Dräger CPS 5800 is a protective suit designed for industrial applications and shipboard operations. This suit provides a reliable barrier against hazardous gases, liquids or solids. It is ideal for anyone who faces chemical exposure situations.

Key features of the Dräger CPS 5800:

- Full protection: Covers the entire body, including the face and hands, to ensure complete protection.
- Limited use: The suit is designed for single use, minimising the risk of cross-contamination.
- Durable materials: Made from high-quality materials that resist the most aggressive chemicals.
- Comfort and mobility: The suit is designed to ensure comfort and freedom of movement even in demanding environments.

If you work in industries such as the chemical industry, industrial maintenance or are involved in maritime operations, the Dräger CPS 5800 could be the right choice for you. Protect yourself and work safely with this reliable protective suit.
