

MULTI-GAS DETECTOR X-AM® 8000

Dräger X-am® 8000 - Multi-Gas Detector

The Dräger X-am® 8000 Multi-Gas Detector is a versatile and reliable device designed to keep workers safe in potentially hazardous environments. With the ability to simultaneously measure 1 to 7 toxic or flammable gases, as well as vapours and oxygen, the Dräger X-am® 8000 is an essential tool for pre-entry screening.

Key Features:

- The detector features a robust pump, which can be connected to hoses up to 45 metres long. The pump adapter allows for easy switching between diffusion and pumping modes, optimising energy and extending the life of the pump.
- Easy to Use: With three function keys, the Dräger X-am® 8000 can be operated with just one hand. The colour display provides a clear view of all the information you need.
- Advanced Software: The detector supports the change of measured gas from PID, CatEx and IR sensors during operation. In addition, unused sensor channels can be hidden to adapt the instrument to the specific measurement task.
- Rugged and Compact: Built to withstand harsh conditions, the Dräger X-am® 8000 is equipped with a shoulder strap for comfortable carrying.

In short, this device offers fast checks, efficient authorizations and documentation, ensuring maximum safety at every stage of the process¹.
