

DRAEGER PSS 4000

Dräger PSS® 4000 - Closed circuit breathing apparatus

The Dräger PSS® 4000 is a lightweight, professional self-contained breathing apparatus specially designed for firefighters. It combines maximum comfort with exceptional pneumatic performance, making it ideal for applications where simplicity and ease of use are fundamental.

This is why the Dräger PSS® 4000 is the perfect choice:

1. **Lightweight and Robust:** One of the lightest SCBAs on the market, the PSS® 4000 offers the same advanced technology as our other professional solutions. The harness, with quick release mechanism and adjustable straps, ensures a comfortable and secure fit.
2. **Optimized backrest:** The ultra-lightweight backrest made of composite material follows the natural contours of the body, offering stability and reducing fatigue. It resists the most hostile conditions.
3. **Resistant Materials:** The harness is made with cutting-edge materials, resistant to daily wear. Stainless steel buckles and aramid fiber straps ensure durability and comfort.
4. **Easy Maintenance:** Quick disassembly and reassembly, one-piece retention system and integrated pressure reducer simplify maintenance.

The Dräger PSS® 4000 offers extraordinary protection for the respiratory tract.
