

VACUUM MATTRESS CDK

CDK is the classic vacuum mattress, robust and reliable. It is equipped with a passing rope which is used in the lower part, with the presence of Santoprene® knobs as a handle and in the upper part as an attachment for the patient fastening belts. The upper side is orange, the underside is gray. The on/off valve, made of chromed brass with built-in hose holder, guarantees tightness at any temperature and unlimited duration.
Particularly robust materials and accurate execution are the prerogatives for a vacuum mattress that can be used by civil protection corps, firefighters, companies and mountain rescue.

Pump required for use (To be purchased separately).
